Work Authorization: 20 hrs/week in Germany

Education

Master of Science in Game Technologies

Sept 2026 – Aug 2028

Bonn-Rhein-Sieg University of Applied Science, Germany

Bachelor of Engineering in Information Technology

Oct 2020 – June 2024

Gujarat Technological University, India

CGPA: 8.61/10 (German Grade: 1.7)

Work Experience

Game Programmer

Aug 2025 – Sept 2026

Xansr Technologies, Hyderabad, India

- Developed gameplay features, character systems, and seasonal events across the Temple Run franchise.
- Optimized game performance using Unity Profiler and resolved gameplay and platform-specific issues.
- Managed live configuration systems with AWS S3 and Firebase, reducing cloud infrastructure costs by ~50%.

Game Programmer

Aug 2024 – Aug 2025

Funcell Games, Ahmedabad, India

- Developed a multiplayer metaverse experience using Photon for real-time player interaction.
- Engineered reusable InstancedMesh and Rapier physics systems for optimized Three.js gameplay.
- Profiled and optimized 20+ playable ads with Chrome DevTools, boosting CTR by 85–120%.

Game Programmer Intern

Feb 2024 – Jul 2024

Xansr Technologies, Hyderabad, India

- Developed reusable gameplay systems including Asset Pipeline and FTUE workflows.
- Implemented Shop, Ad Manager, and Reward systems to support scalable monetization features.

Projects

Eternal Engine (C++ / OpenGL)

GitHub

- Developed a custom game engine in C++ and OpenGL featuring a component-based architecture, parent-child scene hierarchy, model importing, and a real-time editor with scene navigation.
- Built a modern forward renderer with directional, point, and spot lights, integrated debug visualization tools, and configured a cross-platform CMake build system.

Real Money Dice Game (Unity)

Video

- Developed synchronized timer logic using server-driven time to ensure consistent gameplay across all players and devices.
- Implemented realistic dice-throwing mechanics with custom physics simulation in Unity.

RPG Combat (Unreal Engine)

GitHub

- Developed combat mechanics with enemy AI, state machines, and controller support.
- Implemented save/load system and optimized gameplay performance.

Technical Skills

Programming Languages: C++, GLSL, C#, TypeScript, Java, C

Game Engines & Graphics: Unity, Unreal, OpenGL, Photon, Three.js

Libraries & Tools: GLFW, GLAD, GLM, Assimp, ImGui, ImGuizmo, CMake, Git, Perforce, Jenkins

Languages

English (C1), German (A2), Hindi (C2), Gujarati (Native)
